**A Clean-Out Bargain**  
**GRAFTED CHINESE CHESTNUT TREES**

U. S. Department of Agriculture  
We are cleaning up a block of nursery. A few, very few grafted trees must go.

Varieties of proved Blight Resistant Chinese Chestnut, 3-4, 4-5 and 5-6 feet. Many have already produced nuts. Sold regularly at \$4-\$4.50 and \$5.

NOW WHILE THEY LAST we will ship you 2 trees for \$7 or 3 for \$10.

All these trees are in an ice chamber and they have not heard about spring yet. The air is humid. The roots of the trees are covered with moist cold peat. They can be safely planted in early May in any chestnut territory if well planted and well watered.

The trunks are waxed to prevent loss of moisture. This is a great aid to transplanting at any time.

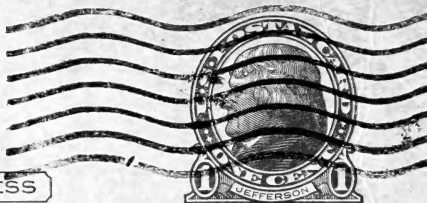

They will be sold now — at this saving — otherwise we will plant them out to be sold with ball of earth, three years from now, at a greater cost to you. Send your order now.

A few grafted Shagbark (shellbark) Romig variety, 5-7 ft., \$5.00. 2 for \$9.00.
